Contents

Definitions of terms

Introduction

Chapter 1 Scope

Chapter 2 Target Performance

Chapter 3 Seismic Isolation Devices

3.1 Isolators

3.1.1 Vertical performance

3.1.2 Lateral performance

3.1.3 Damping performance (Isolators with damping function)

3.1.4 Other isolators

3.1.5 Variation and dependency

3.1.6 Dependency on number of cycles of loading

3.2 Dampers

3.2.1 Damping performance

3.2.2 Variation and dependency

3.2.3 Dependency on number of cycles of loading

Chapter 4 Structural Design

4.1 Structural Design

4.2 Loads and Forces

4.3 Structural Analysis

4.4 Structural Safety

4.5 Others for structural design

Chapter 5 Dynamic Analysis

5.1 Input Ground Motion for Design

5.2 Analysis Model

5.3 Evaluation of Safety

5.4 Confirmation of Ultimate Limit State

Chapter 6 Architectural Plan

6.1 Architectural Plan of Seismic Isolation Layer

6.2 Fire Resistive Covering and Fire Resistance of Isolators

6.3 Maintenance for seismic isolation layer and its peripheral

Chapter 7 Equipment Plan
